- **Healing on a cellular level** through somatic processes

Find relief, grounded clarity and renewed direction.

Maybe you have been holding a lot lately, and yet something still feels unclear, tense or repetitive. In 90 minutes we gently look at what is already shaping you: your patterns, your environment, and the way you have learned to lead yourself within it.

IN THE SESSION

- Step out of mental noise
- Zoom out and view your situation systemically
- Recognise the patterns and influences at play
- Reconnect with what matters

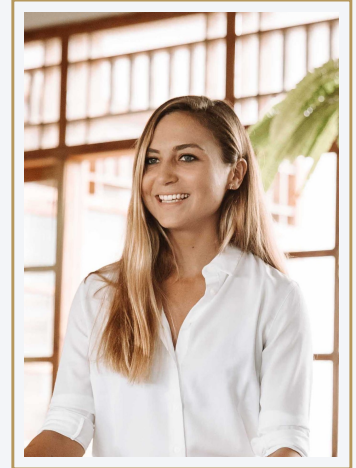

YOU LEAVE WITH

- A clearer understanding of your situation
- A compassionate perspective on your patterns
- Inner orientation and realistic next steps

ABOUT THE FACILITATOR

JR | REGENERATIVE LEADERSHIP

Julia Ruff

Founder and Lead Trainer, JR | Regenerative Leadership

WHY THIS WORK

Julia founded her consultancy and knowledge hub for conscious business and leadership development out of a deep conviction that this is what our collective future needs. With ten years of experience in corporate sustainability, as a department head, manager, CSR lead, consultant and researcher, she saw many promising projects fail long-term due to gaps in leadership, communication and systems thinking. Her guiding question: *How can we channel human energy into truly sustainable success?* She believes it all starts within.

HER APPROACH

Grounded in the St. Gallen Coaching Model®, systemic thinking and the principles of Living System Design (U-Theory, Presencing Institute), Julia works at the intersection of leadership, awareness and human and organisational wellbeing. Her coaching creates space for leaders to examine patterns, reshape habitual emotional and somatic responses, create clarity in complexity and make values-aligned decisions that serve both performance and wellbeing.

WHO SHE WORKS WITH

C-suite executives, senior leadership teams, department heads, entrepreneurs and professionals across multinational organisations.
